

Tabulation of Instream Flow Water Rights – January 2006

This Tabulation of Instream Flow Water Rights was prepared by the Colorado Water Conservation Board (CWCB), Stream and Lake Protection Section. This Tabulation lists all Instream Flow (ISF) water rights that the Board has appropriated or acquired since the Instream Flow and Natural Lake Level Program's inception in 1973.

In most instances, the Tabulation lists the decreed legal description (latitude-longitude or section-township-range) for the ISF water right. Newer rights include legal descriptions generated by the ISF Decision Support System tool. It should also be noted that this Tabulation was generated from the CWCB's database which is separate from the database maintained by the State Engineer's Office for administrative purposes. Please refer to the decree on file with the water court to confirm the details of any ISF water right. Electronic copies of ISF or NLL decrees are available through the CWCB website at www.cwcb.state.co.us.

Most of the water rights contained in this Tabulation are original appropriations by the CWCB. However, the Tabulation does include several water rights that have been donated or otherwise acquired by the CWCB for instream flow purposes. An asterisk after the case number identifies acquired rights in the Tabulation, and the listed case number reflects the case in which the acquired rights were changed to instream flow use by the CWCB.

Every attempt has been made to ensure the accuracy of the data contained in this Tabulation. If you have questions about a given instream flow record, please contact us so that we can verify the information and make any necessary corrections to the database and future publications of this Tabulation.

This Tabulation is updated annually, and copies are available in PDF format on the CWCB website, or by mail for a nominal fee. As the CWCB appropriates new ISF water rights, the database is updated with the new information. The most current information may be queried through the database link on the CWCB's website -- <http://www.cwcb.state.co.us/Streamandlake/Database>.

The following Statistical Summary Report was generated from the Instream Flow Database. The numbers in the statistical summary are rounded to the nearest whole number and reflect only original appropriations by the CWCB through December 2005. Senior water rights acquired by the CWCB for instream flow purposes are not included in the statistical summary to avoid "double-counting" miles.

Statistical Summary Report

Water Division	Number of Appropriations	Number of Miles
1	218	1396
2	166	804
3	140	981
4	286	1891
5	385	2041
6	161	725
7	95	718
TOTAL	1451	8556
